## OBJECTIVE

Aspiring Computer Science and Engineering graduate with strong skills in Python, web development, MySQL, and Object-Oriented Programming, seeking an entry-level IT role to apply my technical knowledge, contribute to projects, and grow professionally.

## EDUCATION

### B. Tech in Computer Science and Engineering

Anantha Lakshmi Institute of Technology & Sciences | 2022 – 2026 | Percentage: 83.9%

### Intermediate (MPC)

Sri Chaitanya Junior College | 2020 – 2022 | Percentage: 92.3%

### Secondary Education

Montessori Smart English Medium School | 2019 – 2020 | Percentage: 99.5%

## SKILLS

- **Programming Languages:** Python
- **Web Technologies:** HTML, CSS, JavaScript, React.js
- **Database:** MySQL
- **Tools:** Git, GitHub, VS Code
- **Core Concepts:** Object-Oriented Programming (OOP), CRUD Operations, Responsive Design, REST APIs
- **Python Libraries:** NumPy, Pandas

## INTERNSHIPS

### AI & Data Analytics Intern | Edunet Foundation | April 2025 – May 2025

- Developed a Plant Disease Detection System using Python and image processing techniques.
- Applied machine learning algorithms for disease classification.

### Python Intern | SkillDzire | May 2025 – June 2025

- Developed Python programs using loops, functions, and OOP concepts.
- Solved real-world coding problems to improve logical thinking and programming skills.

## PROJECTS

### Code Bug Explainer

- Developed an AI-powered web app for bug analysis and solution generation.
- Implemented user authentication, API integration, database storage, and bug tracking using Flask and Python.
- Technologies Used: Python, Flask, MySQL, HTML, CSS, JavaScript

### Food Recommendation Based on Mood

- Designed and developed a food recommendation system that suggests food items based on the user mood.
- Implemented logic-driven mapping between moods and food categories to provide relevant suggestions.
- Technologies Used: Python, Flask, HTML, CSS, JavaScript.

### Hybrid Deep Learning and Image Processing Approach for Bank Cheque Validation

- Developed an AI-based bank cheque validation system using OCR, CNN, image processing, SIFT + SVM, and Generative AI.
- Built a Django web application for real-time cheque processing and verification.
- Technologies Used: Python, Django, OCR, CNN, SIFT, SVM, HTML, CSS, JavaScript.

### E-Commerce Website

- Developed a responsive e-commerce web application using React.js with product listing, product details, and order placement features.
- Integrated REST APIs for handling HTTP requests and data rendering.
